EDUCATION

B.E. in Computer Science, Rizvi College of Engineering, Mumbai - **8.0 CGPA**

2025

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, C++
Development: React.js, Node.js, Spring Boot, REST APIs
Database: SQL, MongoDB
Cloud & DevOps: AWS, Docker, Git

EXPERIENCE

System Administrator (Kyndryl Solutions)

July 2025 – Present

- Administered and supported **Windows and Linux servers** in enterprise production environments, handling patching, monitoring, and incident troubleshooting.
- Managed **Nginx middleware** as a reverse proxy and web server, including validation of configuration files and **SSL/TLS certificates** for secure application delivery.
- Developed **Bash scripts** and scheduled **cron jobs** for automated log rotation, retention, and system housekeeping, reducing disk utilization risks.
- Executed **application deployments** by rolling out new **JAR files**, updating **DNS A records**, replacing application-specific **Nginx configuration files**, and reloading services during DR drills and planned releases.

Mobile App Developer Intern (Wizard Support Services)

Mar 2025 - May 2025

- Developed a React Native Expo app to enhance accessibility to stock market advisory packages.
- Implemented key features such as payment gateway integration and dynamic package selection to deliver a seamless user experience.
- Integrated third-party APIs for real-time stock data, ensuring users received accurate and timely market insights.

PROJECTS

Intro 🌀 (Next.js, Gemini)

Feb 2025 - May 2025

- Built an AI mock interview platform using Next.js to generate role-specific questions, and provide automated answer evaluations.
- Designed an interactive UI with Clerk authentication, webcam support, voice input, and real-time visual feedback using TailwindCSS and shadCN.
- Integrated Gemini API to provide questions, answers and return feedback.

Nerch 🌀 (Spring Boot, Reactjs, React flow)

Active

- Building a full-stack visual inventory management system using React Flow and Spring Boot, enabling users to create customizable node-based workflows for tracking resources, dependencies, and metadata across organizational processes.
- Implemented role-based access control (Admin/Owner/User), providing node-level permissions where owners can edit their nodes, users can view, and admins maintain full system control.
- Designed an interactive graph-based interface for visualizing relationships and tracking item status, with configurable node attributes to support diverse use cases from IT infrastructure to project management.

Musync 🌀 (React.js, Redux, Node.js, Express.js, TailwindCSS, MongoDB)

Nov 2023 - Feb 2024

Parkit 🌀 (IoT, React Native Expo, Firebase)

Mar 2024 - May 2024
